FRAMING

APRIL 2025

INTRODUCTION TO FRAMING

Photographers and their clients often cherish the opportunity to frame their images, but navigating the framing process can sometimes be challenging.

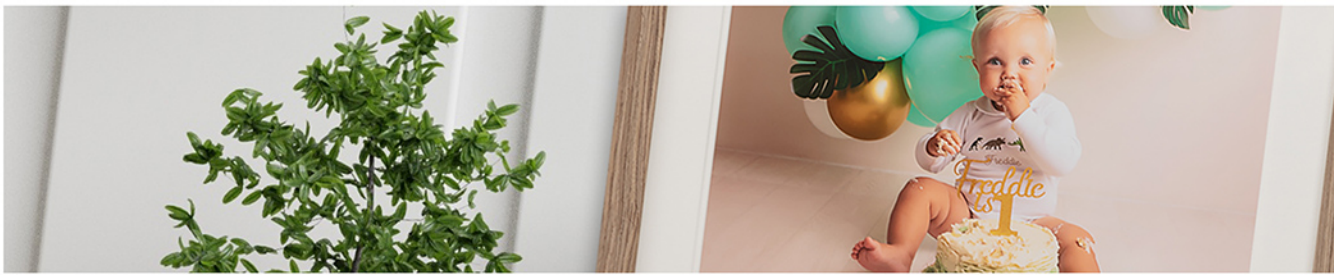

We have redesigned our framing service to be as user-friendly as possible. Starting from the ground up, we have customised our service to support any frame style and finish. This allows your customers to easily select their preferred frame, choose a finish, and specify the sizes they need. It is genuinely that straightforward! Now, you'll never have to decline a request due to the unavailability of a specific finish for a chosen frame.

Additionally, we have streamlined the sample display process. Select from frame chevrons to pick the ideal frame, and utilize our Sample Frame Finishes to showcase available finishing options. Furthermore, with our full-size wall samples available in various sizes, visualising the final product has never been easier.

This seamless process enables you and your customers to effortlessly select the ideal frame and finish for their cherished images.
